## Summary

Driven JavaScript developer with a passion for continuous learning and problem solving. Skilled at taking a design and turning it into a fully functioning and responsive app. Passionate about building intuitive and beautiful user interfaces and creating seamless user experiences. Committed to using semantic HTML and accessibility best practices. Experience creating SPAs using React with hooks to consume APIs and using tools like Redux to manage state. Experience using CSS and CSS frameworks such as Bootstrap, Material-UI, Styled Components and Emotion, but especially comfortable and enthusiastic about utility-first CSS frameworks like Tailwind.

## Projects

**Climbing Weather,** *A rock climbing area weather app*
**Live Demo** - https://jovial-goldberg-ee1b37.netlify.app/
**GitHub Repo -** https://github.com/RamsayRomero/condies
**Description** - This is an app that uses data from the Weatherbit API to provide weather information for my favorite rock climbing areas. It taught me how to fetch data and update state with the useEffect hook, persist user settings with local storage, and to create a responsive layout where each column has independent scroll behavior.
**Technologies Used** - React, Tailwind, Axios

**Windbnb,** *An Airbnb UI clone*
**Live Demo** - https://mystifying-mcclintock-45a916.netlify.app
**GitHub Repo** - https://github.com/RamsayRomero/windbnb
**Description** - This was my solution to a coding challenge from the site devchallenges.io which provided a complete design on Figma and no instructions or limitations on how to create the finished app. Solving this problem taught me how to take a design and produce an identical and functional react app. It taught me to use form elements to dynamically filter data in a responsive way.
**Technologies Used** - React, Redux, Tailwind

## Professional Experience

**Cook,** *Panda Express*
2014 – present | San Dimas, CA

- Paid close attention to detail to ensure high food quality and recipe consistency for the entirety of the shift.
- Performed under pressure in a highly fast paced environment where we consistently made around $10,000 in daily sales.
- Helped train many other cooks to ensure the entire team was operating at high standards.
- Although I worked here for many years, I never stopped adopting a growth mindset and continued to strive to improve at my job and help my coworkers improve as well.

# Ramsay Romero

*Front End Developer*

Glendora, CA

## Education

**Computer Science,**
*Pasadena City College*
2014 – 2019 | Pasadena, CA

## Skills

- HTML
- CSS
- JavaScript
- React
- Tailwind
- Redux
- GitHub
- Node.js
- Next.js

## Courses

**Epic React,** *Kent C Dodds*

- React Fundamentals
- React Hooks
- Advanced React Hooks
- Advanced React Patterns
- React Performance
- Testing React Apps
- React Suspense
- Authentication
- React Query

## Interests

**Rock Climbing**

*I have been a devoted rock climber for 6 years. It has always been more than a hobby to me and I have been dedicated and driven to keep improving at this sport. It taught me the value of sacrifice and consistent hard work in order to see improvements and achieve my goals. The feeling I get when I solve physical challenges on the rock is addicting and is the same feeling I get solving mental challenges while coding.*
