

Summary

Driven and self-sufficient frontend web developer with a passion for continuous learning and problem solving. Skilled at taking a design and turning it into a fully functioning and responsive app. Passionate about building intuitive and beautiful user interfaces and creating seamless user experiences.

Projects

Crimp Advisor, *A fullstack rock climbing journal app*

Live Site - crimpadvisor.com 

GitHub Repo - github.com/RamsayRomero/crimp-advisor 

Description - A fullstack rock climbing journal application built with Next.js, TypeScript, Prisma, Postgres, React Query and TailwindCSS. Features authentication with NextAuth and Auth0, uses the Google Maps and Google Places api and uses Recharts for data visualization. Users can create and update information about rock climbs and climbing areas, and see climbing activity posted by other users.

Climbing Weather, *A rock climbing area weather app*

Live Demo - <https://jovial-goldberg-ee1b37.netlify.app/> 

GitHub Repo - <https://github.com/RamsayRomero/condies> 

Description - This is an app that uses data from the Weatherbit API to provide weather information for my favorite rock climbing areas. It taught me how to fetch data and update state with the useEffect hook, persist user settings with local storage, and to create a responsive layout where each column has independent scroll behavior.

Windbnb, *An Airbnb UI clone*

Live Demo - <https://mystifying-mcclintock-45a916.netlify.app> 

GitHub Repo - <https://github.com/RamsayRomero/windbnb> 

Description - This was my solution to a coding challenge from the site devchallenges.io which provided a complete design on Figma and no instructions or limitations on how to create the finished app. Solving this problem taught me how to take a design and produce an identical and functional react app. It taught me to use form elements to dynamically filter data in a responsive way.

Professional Experience

Cook, *Panda Express*

2014 – present | San Dimas, CA

- Performed under pressure in a highly fast paced environment where we consistently made around \$10,000 in daily sales.
- Trained many other cooks to ensure the entire team was operating at high standards.
- Although I worked here for many years, I never stopped adopting a growth mindset and continued to strive to improve at my job and help my coworkers improve as well.

Ramsay Romero

Front End Developer

 Los Angeles, CA

 Ramsay.Romero@gmail.com

 6262530409

Education

Pasadena City College

2014 – 2017 | Pasadena, CA

Skills

HTML | CSS | JavaScript

React | TypeScript

Tailwind | Redux | GitHub

Node.js | Next.js

MongoDB | Firebase

React Query | GraphQL

Prisma | Postgresql

Courses

Epic React, *Kent C Dodds* 

- React Fundamentals
- React Hooks
- Advanced React Hooks
- Advanced React Patterns
- React Performance
- Testing React Apps
- React Suspense
